Summary

Product Designer with 4+ years of deliberate practice turning complex human problems into clear, intuitive experiences. I study how people think, decide, and get stuck, then design the path that removes the obstacles between them and what they need, with outcomes that hold up under scrutiny: 92% task success in healthcare navigation and a 60% reduction in decision uncertainty.

Core Skills

Product & UX Design: End-to-End Product Design · Interaction Design · Visual Design · Identity Design · Information Architecture · Mobile-First Design · Motion Design · Micro-interactions · Design Sprints
AI-Integrated Design: AI-Assisted Flow Design · Agent-Aware UX Patterns · Cognitive Load Reduction · Responsible AI Practices · Bias Mitigation · Prompt & Context Engineering
Research & Validation: User Research · Qualitative & Quantitative Methods · Usability Testing · A/B Testing · Journey Mapping · Empathy Mapping · Card Sorting · Affinity Diagrams · Wireframing · Prototyping · User Personas · Maze · UserTesting · Hotjar · Usability Heuristics
Design Tooling: Figma · Framer · Sketch · Adobe XD · InVision · Balsamiq · Webflow · Principle · Miro · Photoshop · After Effects · Illustrator · Zeplin
Visual Craft: Typography · Color Theory · Gestalt Principles · Iconography · Visual Hierarchy · Responsive Design · Layout Composition
Accessibility: WCAG AA/AAA Implementation · Keyboard Navigation · Screen Reader Optimization · Accessibility Auditing · Stark Plugin · Inclusive Design
Technical: React.js · TypeScript · JavaScript ES6+ · HTML5 · CSS3 · Tailwind CSS · Git

Professional Experience

Product Designer Intern

Jan 2026 – Present

GD Infotek LLC

Remote, TX

- Led a heuristic audit of the company's live IT staffing website, identifying 5 critical usability issues stemming from one root cause: the site served two distinct audiences without committing to either.
- Built two stakeholder-informed personas from audit findings and direct business conversations, anchoring a client-first information architecture decision and a complete homepage and enrollment form redesign.
- Restructured a single-page enrollment form into a two-step flow and delivered a high-fidelity Figma prototype, reviewed and approved by the business owner.

Product Designer – Fintech

2025 – 2026

Self-Initiated Case Study · UX Research · Interaction Design · Figma

- Conducted 40+ user interviews and synthesized findings through affinity diagrams and empathy mapping. Identified spending anxiety as the core friction point that existing subscription interfaces had overlooked entirely.
- Mapped user disengagement through journey mapping sessions to pinpoint where financial decisions broke down. Redesigned the experience using agent-aware UX patterns, achieving a 50% reduction in decision friction.
- Validated the redesign through moderated usability testing, iterating on visual hierarchy and confirming an NPS improvement over the original flow.

Product Designer – Healthcare

2025 – 2026

Self-Initiated Case Study · User Research · Wireframing · Prototyping · WCAG AAA

- Conducted 30+ patient interviews and produced journey maps that revealed booking failures stemmed from vocabulary barriers. Restructured the information architecture around symptom-first guidance and plain-language reasoning.
- Replaced a directory-style specialist browser with a 3-question triage flow surfacing one clear recommendation. Reduced decision uncertainty by 60% and created a guided experience over an overwhelming one.
- Delivered a mobile-first interface validated through usability testing with 12 participants, achieving a 92% task success rate and WCAG AAA compliance across all tested flows.

UX Designer

May 2024 – Jan 2026

University of North Texas

Denton, TX

- Led 50+ user research interviews on student-facing platforms with low task completion. Produced journey maps and personas that anchored a full redesign driving a 45% improvement in task completion rate.
- Built a 20-50 component design system in Figma with auto layout and design tokens. Standardized interaction patterns across 8 campus tools achieving 100% design-to-code parity.
- Conducted accessibility auditing with the Stark plugin and embedded keyboard navigation and screen reader support, expanding the accessible user base by 30%.

Associate Software Engineer

Jun 2022 – Jul 2023

Accenture (Client: Merck · Infra Transformation)

Hyderabad, India

- Collaborated with UX researchers and designers on Merck's enterprise ServiceNow platform serving 5,000+ users, translating design specifications into interface changes that improved workflow clarity and reduced navigation errors.
- Modified 20-50 portal elements using semantic HTML and accessibility standards, eliminating audit failures and reducing production incidents by 35%.

Freelance UI/UX Designer

2020 – 2022

Independent Practice

Hyderabad, India

- Designed responsive web interfaces for small business clients based on user research and behavior analysis, applying typography, color theory, and Gestalt principles to ship polished, on-brand designs.

Education & Certifications

Master of Science in Computer Science

University of North Texas

Aug 2023 – May 2025

Denton, TX · GPA: 3.545

Google UX Design Professional Certificate

Google
