SUMMARY

Product Designer & Frontend Engineer specializing in AI-powered product experiences for fintech and healthcare — where design decisions carry real stakes. With 3+ years bridging interaction design and React/TypeScript engineering, I build systems that reduce friction at the moments that matter most: a patient choosing a specialist, a user managing financial anxiety, a team scaling a product across thousands of users. I bring end-to-end ownership from user research through production code, with a track record of shipping accessible, AI-assisted interfaces that measurably move task completion, error reduction, and user trust.

SKILLS

Product & Interaction Design

End-to-End Product Design, Interaction Design, Visual Systems, Information Architecture, Component Architecture, Design Thinking, Responsive & Mobile-First Design, Micro-interactions, Motion Design

AI-Integrated Design

AI-Assisted Flow Design, Prompt & Context Engineering, Agent-Aware UX Patterns, Responsible AI Practices, Bias Mitigation, Cognitive Load Reduction, AI Workflow Optimization

Research & Validation

User Research (Qualitative & Quantitative), Usability Testing, A/B Testing, Journey Mapping, Empathy Mapping, Card Sorting, Competitive Analysis, Affinity Diagrams - Amplitude, Hotjar, Maze, UserTesting

Design Tooling

Figma (Design Systems, Auto Layout, Prototyping), Framer, Sketch, InVision, Webflow

Frontend Engineering

React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, REST API Integration, State Management, Performance Optimization

Accessibility & Compliance

WCAG AA/AAA Implementation, Semantic HTML, Keyboard Navigation, Screen Reader Optimization, Accessibility Auditing

PROFESSIONAL EXPERIENCE

Software Engineer Intern - Product Design & Frontend

GD Infotek · Remote, TX · Jan 2026 – Present

- Architected React + TypeScript component systems across 5+ teams, improving cross-application consistency by 35% and eliminating redundant development cycles.
- Designed 6–10 end-to-end user flows and high-fidelity Figma prototypes, validating each through usability testing and achieving 85% design-to-code implementation fidelity.
- Optimized API-driven interfaces with robust error handling and contextual loading states, reducing user-reported production errors by 40%.

Software Engineer - Frontend

University of North Texas · Denton, TX · May 2024 – Jan 2026

- Led 50+ user research interviews to inform React application redesigns serving 2,000+ students, driving a 45% improvement in task completion rate through iterative design.
- Built a 20–50 component design system in Figma and implemented it in code, achieving 100% design-to-code parity across 8 campus tools.
- Implemented WCAG AA accessibility standards across all student-facing interfaces, expanding the accessible user base by 30% with zero performance regressions.

Associate Software Engineer

Accenture (Client: Merck) · Hyderabad, India · Jun 2022 – Jul 2023

- Refactored legacy JavaScript modules into a modern React architecture for 5,000+ enterprise users, cutting load time by 50% and improving code maintainability by 40%.
- Integrated REST APIs with async workflows and edge-case error handling, reducing production incidents by 35%.

across enterprise healthcare systems.

- Redesigned healthcare UI components with semantic HTML and full keyboard navigation, achieving WCAG AA certification across enterprise product surfaces.

FEATURED CASE STUDIES

AI-Powered Subscription Optimization - Fintech

UX Research · Interaction Design · Figma Prototype

- Conducted 40+ user interviews to identify spending anxiety as the primary friction point, synthesizing findings into personas and journey maps that anchored the AI-assisted design strategy.
- Designed AI-assisted subscription flows that reduced cognitive load by 50%, validated through usability testing with a 92% task success rate and measurable NPS improvement.

Healthcare Appointment Booking - UX Case Study

User Research · Wireframing · Prototyping · Mobile-First Design

- Conducted 30+ patient interviews to map healthcare workflows, designing AI-guided specialist selection flows that reduced decision uncertainty by 60%.
- Delivered a mobile-first, accessibility-first interface achieving WCAG AAA compliance with an 88% audit pass rate across all tested user flows.

EDUCATION

Master of Science in Computer Science

University of North Texas · Denton, TX · Aug 2023 – May 2025

Google UX Design Professional Certificate

March 2026
